

IFIS 2025 Training Calendar

Why Training at IFIS is Your Most Practical Investment Yet

Let’s face it—most training programs promise the world but deliver little more than theoretical jargon you’ll forget in weeks. At IFIS, we believe in *redefining training*. Our approach is rooted in one simple truth: **“Discere Faciendo” – Learn by Doing**.

We don’t teach for the sake of teaching. We train to solve real-world problems, to empower professionals to think critically, and to arm you with skills that *actually work*. Our programs challenge the status quo, combining theory with hands-on application that transforms your knowledge into immediate results. Take time to explore your preferred course below and book in time to avoid dissappointments.

Month	Course/Program	Dates	Duration	Fees	Delivery	Key Learning Outcomes
January	Certified Fraud Forensics Professional (CFFP)	Jan 6–28	4 Weekends	UGX 4,800,000	Physical/ Virtual (Hybrid)	Learn fraud investigation techniques, evidence handling, and forensic reporting. Certify your skills.
	Certified Fraud Examiner (CFE) Weekend	Jan 18	4 Weekends	\$1,490	Physical/Virtual	Master fraud detection and investigation techniques using practical case studies.
February	Digital Forensics Investigations	Feb 12–14	3 Days	UGX 1,200,000	Physical/Virtual	Conduct hands-on forensic analysis and recover evidence from compromised systems.
	Cybersecurity Essentials for Beginners	Feb 20–21	2 Days	UGX 500,000	Physical/Virtual	Introduction to cybersecurity concepts with practical exercises in securing IT systems.
March	Certified Cybersecurity Manager (CCSM)	Mar 8–30	4 Weekends	UGX 4,800,000	Physical/Virtual	Manage cybersecurity frameworks, conduct threat assessments, and lead incident response simulations.
	Cybersecurity for Executives	Mar 21	1 Day	UGX 400,000	Physical/Virtual	Equip leaders with the tools to oversee cybersecurity strategy and compliance effectively.

Month	Course/Program	Dates	Duration	Fees	Delivery	Key Learning Outcomes
	Hands-on Penetration Testing	Mar 24–26	3 Days	UGX 1,500,000	Physical	Learn ethical hacking techniques with real-world penetration testing scenarios.
April	Certified Fraud Examiner (CFE)	Apr 5–27	4 Weekends	\$1,490	Physical	Practical fraud investigation techniques focusing on real-life cases and global compliance.
	Advanced Excel Data Analytics	Apr 10–11	2 Days	UGX 700,000	Physical	Use Excel to build dashboards, analyze datasets, and visualize business insights.
	Cybersecurity Conference <i>Theme: "Securing the Future -- AI-Driven Security and Risk Management (Trends, Threats, and Tools). @Speke Resort Munyonyo.</i>	Apr 25	1 Day	UGX 500,000 members 650,000 non-members	Hybrid (both physical and virtual).	Explore emerging cybersecurity trends, such as AI in threat detection, blockchain security, and regulatory frameworks. We target only 50 participants. Book your slot now. Note: Unlimited virtual slots.
May	Certified Risk Strategy Professional (CRISP)	May 3–25	4 Weekends	\$1,490	Physical/ Virtual	Implement risk management strategies, create risk heat maps, and conduct scenario analysis.
	Practical Digital Forensics for Beginners	May 22–23	2 Days	UGX 800,000	Physical	Hands-on evidence collection and analysis using open-source forensic tools.
June	Certified Fraud Examiner (CFE)	Jun 7–29	4 Weekends	\$1,490	Physical/Virtual	Fraud detection and reporting techniques with a focus on fraud analytics.
	Windows Systems Forensics Analysis	Jun 19–20	2 Days	UGX 650,000	Physical	Investigate Windows-based systems for malware, unauthorized access, and digital artifacts.
	IT Security Essentials Training	Jun 26–27	2 Days	UGX 500,000	Virtual	Learn foundational IT security practices, including secure configurations and vulnerability management.

Month	Course/Program	Dates	Duration	Fees	Delivery	Key Learning Outcomes
July	Certified Business Intelligence Data Analyst (CBIDA)	Jul 5–27	4 Weekends	UGX 4,800,000	Physical/ Virtual	Gain expertise in Power BI, Tableau, and data storytelling for business decision-making.
	Introduction to Cybersecurity	Jul 24–25	2 Days	UGX 500,000	Virtual	Practical introduction to cybersecurity basics, including hands-on labs for securing systems.
August	Certified Fraud Examiner (CFE)	Aug 9–31	4 Weekends	\$1,490	Physical/Virtual	Practical fraud management techniques with a focus on emerging fraud schemes.
	Fraud Awareness Training	Aug 20	1 Day	UGX 500,000	Virtual	Build fraud awareness through interactive sessions on detection and prevention strategies.
September	Anti-Money Laundering for NGOs	Sep 25–26	2 Days	UGX 500,000	Physical/ Virtual	Understand AML compliance requirements with practical case studies for NGO operations.
October	Investigation and Report Writing	Oct 15–17	3 Days	UGX 600,000	Physical/ Virtual	Write impactful investigation reports based on real-world cases and simulated investigations.
	Data Protection & Privacy Training for Schools	Oct 22–23	2 Days	UGX 250,000	Physical/ Virtual	Equip schools with practical tools to manage student data securely and comply with privacy laws.
November	Certified Risk and Crisis Management Expert (CRCM)	Nov 10–12	3 Days	\$1,200	Physical/Virtual	Manage organizational crises with practical risk mitigation techniques and frameworks.
	Data Protection & Privacy Training for Hospitals	Nov 21–22	2 Days	UGX 250,000	Physical/ Virtual	Focus on hospital-specific data protection practices to enhance compliance and patient privacy.
December	Certified Fraud Examiner (CFE)	Dec 7–29	4 Weekends	\$1,490	Physical/Virtual	End the year mastering fraud prevention and compliance through practical modules and simulations.

Why Attend the Cybersecurity Conference?

Theme: "Securing the Future -- AI-Driven Security and Risk Management (Trends, Threats, and Tools).

- a) Engage with industry leaders to discuss advancements in cybersecurity.
- b) Explore practical use cases of AI, blockchain, and cloud security.
- c) Participate in interactive panel discussions on compliance with emerging regulations.
- d) Network with peers, vendors, and cybersecurity experts.

April 2025 IFIS Conference Topics

- a) AI in Cyber Threat Detection – Learn how to harness AI to identify and neutralize sophisticated cyberattacks.
- b) Fraud Prevention with Machine Learning – dig deeper into predictive analytics to combat financial crimes.
- c) Ethics and Risks in AI Adoption – explore balancing innovation with accountability in AI-driven decision-making.
- d) Future-Proofing Organizations – learn how to build resilience through AI-enhanced risk management frameworks.
- e) Cybersecurity demos and simulations. Learn how to set up a SOC and save your company lots of money!

Register Early to Secure Your Spot!

Why Wait for Disaster? Train to Prevent It.

In an era of ransomware attacks, data breaches, and escalating fraud, training is not optional—it's survival. Our 2025 Cybersecurity Conference on April 25 will explore case studies of organizations that overcame threats and those that didn't. Learn from the failures, successes, and the latest tools shaping digital defense. Your next crisis doesn't wait. Neither should your training.

How to Register

Visit www.forensicsinstitute.org or contact us at +256 782 610 333/ or +256 784 270 586 / +256 708 182 121 for inquiries. Early bird discounts apply! Email: admissions@forensicsinstitute.org

Need Custom Training? We've Got You Covered!

At IFIS, we understand that no two organizations face the same challenges. That's why we offer custom training programs tailored to your specific needs. Whether you're tackling unique cybersecurity threats, fraud vulnerabilities, or risk management hurdles, our expert trainers will design a course that fits your goals and equips your team with actionable solutions.

Here's how it works:

- a) Flexible Team Sizes -- We provide custom training for teams of 3 or more, delivered at your organization's preferred location or online.
- b) Specific to Your Challenges -- Our training is built around your industry, your obstacles, and your objectives.
- c) Expert Guidance -- Learn from practitioners with years of hands-on experience in tackling real-world problems.

Let's Build Your Custom Program

Contact us today to discuss your unique needs and create a tailored training experience that delivers measurable results.
